

100 Top Picks for Homeschool Curriculum by Cathy Duffy

Cathy Duffy is a veteran home educator who published an earlier comprehensive work: *Christian Home Educators' Curriculum Manual*. This smaller book is smaller, current, and easy to use. It used to be difficult to find homeschool curriculum. Now there is so much that is difficult to decide which curriculum is a good fit for your child.

Home Education Curriculum is designed for a specific approach to home education. The traditional classroom approach may work for some families, while the classical approach is better for others. Cathy provides a nice diagnostic chart to help you decide what approach works best for your child and family. She includes material to help you craft a philosophy of education and a plan that incorporates your philosophy of education.

This book delivers on the promise inferred by the title - it introduces 100 top curriculum picks and helps the reader choose curriculum that fits the needs of their student while considering their personal philosophy of education.
